CHAOS CONTROL

ACTION

INFOGRAMES

Do you remember a long time ago when we sent out satellites to the far reaches of space looking for intelligent life? Well, we've finally found it. Unfortunately the alien beings are hostile, and would prefer to eat us than talk.

Chaos Control has game play similar to Sewer Shark and Microcosm. You guide your cursor around the scene while everything scrolls for you. The computer graphics of Chaos Control are

The aliens have started to set up hives within the confines of the city.

simply astonishing to see. The enemies actually look like they belong with the background.

Chaos Control may not be for everyone, but it's a great game to watch, and it's fun to play.

Take a swim around the Statue of Liberty. New York must be saved from the aliens.

Mechs of all kinds will try to blast you into space dust. Who's quicker?

TARZAN

ACTION

GAMETEK

Tarzan is swinging his way over to the Super NES format with all of the action you'd expect from those classic movies and books.

Tarzan was raised by apes. When he discovers humans for the first time (and one of them is a girl—alert Cyber!), he decides to make contact. Unfortunately, they are captured by some other jungle denizens so Tarzan must risk life-and-limb to save them. Tarzan is an action-packed adventure through a perilous jungle. Will the Lord of the Apes be able to save the other humans?

You can climb up trees, swing on vines, or battle vicious critters.

Treacherous pitfalls will open up in the ground and swallow you whole.

RETURN FIRE

ACTION

SILENT SOFTWARE

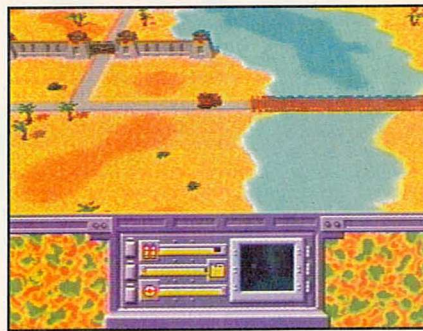

A long while back there was a great game called Herzog Zwei for the Genesis. It was an action-packed military simulation. Return Fire is sort of like that in a sense. The object is to choose a tank, helicopter, or any one of the many vehicles available to you, then search for the enemy base and crush it.

What makes Return Fire so cool is that it's easy to learn how to play. It's very action-oriented, and the graphics are really good. It scales in and out smoothly to give you the big picture.

Return Fire can also be a two-player game with the split-screen. I don't know about you, but I've always loved no-brainer war sims. This one is loads of fun, and I recommend it to anyone who has a 3DO.

Load up your tank and prepare yourself for a search-and-destroy mission.

The screen will scale in and out to give you the best view possible.

Two-player games can be the greatest. Mondo intense, might I add.
